

# Blast Freezer

with evaporator on ceiling -18 °C / -38 °C

# SFD

MUNZ supplies sophisticated blast freezing solutions for bakery and confectionery. With our outstanding modular build blast freezers with evaporator mounted on the ceiling SFD, we are able to deliver the right blast freezing solution for every product and every production size. The blast freezer SFD is deliverable alternatively performed as tunnelsystem for highest operational capacity or as park bay system for highest flexibility. The park bay system enables you to freeze products with different freezing time simultaneously in the same unit. MUNZ offers the best solutions for every day efficient and reliable bakery and confectionery production.

- Housing surface complete stainless steel
- Housing insulation foamed 100% HCFC-free
- optional: single stage compressor: -18 / -28 °C  
two stage compressor: -18 / -38 °C
- Special high performance evaporators
- MUNZ Cooltouch® Control

Quality for more than  
25 years
